# CX multi-stream video simply faster & better

Mobile Video Monitoring  
TeleEye M-303

IR Remote Control for CX

TeleEye CX Series is a range of simple to use yet feature rich 4-, 8- and 16-channel video recording servers suitable for small to medium sized surveillance applications. Powered by its revolutionary SMAC-M multi-stream video coder, TeleEye CX delivers truly "no compromise" on both DVD-quality recording and fast video transmission performance. TeleEye CX incorporated with SMAC-M can record 60% longer and transmit 50% faster than MPEG-4 systems.

TeleEye CX guarantees consistent high quality recorded video up to 100/120fps at CIF and 25/30fps at D1. The system is quick to install and easy to configure. It delivers users with real time video over a mobile phone while they are on the move. TeleEye CX can also allow user to manage video simply using a web browser. When using with TeleEye Multi-site Software, videos from up to 16 sites can be monitored and recorded.
